ÖFFNEN

## Strike!

You successfully commissioned a NodeMCU custom build from the `master` branch. You selected the following 11 modules: `bit file gpio http i2c net node rtctime tmr uart wifi`.

We'll keep you posted by email about the progress of your build.

In the meantime I suggest you take a look at the build stats (`stats.php`) to find out how your firmware configuration compares to others in the community.

## Pay-back time

Do you like this service?

**Imagine I were your neighbour, the guy next door.**

Would you buy me a beer for all the hard work I do for you? Chances are I'm *not* right next door but the beauty is: beer can be teleported thanks to quick'n easy PayPal donations ([https://www.paypal.com/cgi-bin/webscr?cmd=\\_s-xclick&hosted\\_button\\_id=7DWME2TBHH6B8](https://www.paypal.com/cgi-bin/webscr?cmd=_s-xclick&hosted_button_id=7DWME2TBHH6B8)). In Switzerland a beer costs around \$5 in a bar.

The other way to support this service is by shopping at Banggood (<http://www.banggood.com/?p=PT19151269030201502M>) or AliExpress (<http://s.click.aliexpress.com/e/qVRvJMbqB>) through my affiliate links. For every item you buy I get a small kickback. Thank you!

## Zum Download

Aktualisieren Sie fehlende Treiber in weniger als 2 Minuten (kostenlos).
